Page Elements

Element ID	Element Description
EL1	Title [not used in this wireframe]
EL2	My Account Navigation [removed from page]
EL3	Heading The heading is initially taken from the uploaded filename. This can be updated and saved by the user.
EL4	Instructions
EL5	Error Messages

Element ID	Element Description
EL6	**Please review Line Numbers** Only appears if the website is unable to match certain items uploaded. Numbers are anchor links to the Line Numbers in question.
EL7	**Enter name for Bill of Materials#** Label and text input
EL8	**Download .xls** Link to download the BOM as an Excel file. If no name has been entered, the user's operating system will choose a name (typically "untitled").
EL9	**Pagination controls** Paging is only displayed if more than 25 products in the BOM. The currently displayed range of products is always shown, as well as the total number of products available. Previous link is shown if not on the first page. Next link is shown if not on the last page. 5 specific page links are shown (the current page is not a link).
EL10	**Buy Selected** Click to add only selected and matched products to basket. If any unmatched items are selected, they will not be added to basket. Items that are unmatched will display an error message in the basket/cart (current existing basket/cart functionality). If no items are selected, button is disabled.
EL11	**Email** Launches pop-up allowing user to send the list via email. See 3.2.30 My Account Email BOM
EL12	**Save** Saves BOM (including any changes made) to the list of BOMs. Cannot be saved unless a BOM name has been entered – triggers error message.
EL13	**Column headings**
EL14	**Product Listing row** Lists product details for matched products. The exact display of the product details is subject to product listing defined for BOM results. This includes: Image, store order code, mfg part number, short description, first 3 tiers of pricing, availability and lead time, & ROHS icon. Refer to other document for details. Note: UOM is being added to pricing column. There is a column with a Qty field and Buy button which can be used to add a specific item to the basket/cart. There is a checkbox which is selected/checked by default for matched items. Users can then press the Buy Selected (EL10) or Delete Selected (EL25) buttons to perform corresponding actions on selected items.
EL15	**Quantity input** The quantity specified in the BOm is initially displayed here. It can be adjusted and saved as part of the BOM, or the quantity can be adjusted before clicking the Buy button, which will add the specified quantity of this item to the basket.
~~EL16~~	**~~Delete link~~** ~~Click to remove the product from the BOM. This will cause all subsequent Line Numbers to update, including those identified in EL6.~~ [Removed - replaced by checkbox (EL27) and Delete Selected button (EL25)]

element14

Element ID	Element Description
EL17	**Unmatched Item row**
	If an item cannot be identified from the information in the BOM upload then the item is represented here pre-populated with the specified term used for the search. The table columns are merged except for the row number and the select checkbox column.
	A message indicating that 0 matches were found and a field with the search value prefilled from the upload along with a button to search allows the user to modify their search term. See wireframe 3.2.29 MyAccount BOM Search Results.
	The select checkbox is unselected/unchecked by default. Selecting the checkbox will allow the user to then press the Buy Selected (EL10) or Delete Selected (EL25) buttons to perform corresponding actions on selected items.
	Adding an unresolved item to the basket/cart will result in an error message on the cart/basket page for those items (current existing basket/cart functionality).
EL18	**Secondary Pagination Controls**
	Same functionality as EL9
EL19	**Secondary Buy Selected button**
	Same functionality as EL10
EL20	**Secondary Email button**
	Same functionality as EL1
EL21	**Secondary Save button**
	Same functionality as EL2
EL22	**Customer Services**
	Links to content managed page. Displayed if no price set up for the item.
EL23	**Not used**
EL24	**Not used**
EL25	**Delete Selected Button**
	When pressed, opens warning message overlay and allows user to cancel action or to confirm delete process for items that are selected. Refer to EL30 for full description of function.
	If no items are selected, Delete Selected button is disabled.
EL25a	**Delete Selected Button copy**
	Copy of EL25
EL26	**Master Select Checkbox**
	Toggles to select or unselect all checkboxes based on setting of Master.
	Default for Master is to be checked, with matched items also checked, however multiple-match and unmatched items are default unchecked for initial page load (See EL17 & EL28).
	Checking this box, will check all rows with checkboxes. Selecting all rows regardless of whether they are matched, multiple-match, or unmatched items (no distinction is made).
	Unchecking this box, unchecks all rows with checkboxes. Unselecting all rows regardless of whether they are matched, multiple-match, or unmatched items.
EL27	**Select checkbox**
	When the checkbox for specified row is checked and Buy selected button (EL10) is clicked, the selected items will be added to the basket along with all others that have this box checked
	If Delete selected button (EL25) is clicked then the warning message overlay is displayed (See EL30 for description).

Element ID	Element Description
EL28	**Multiple Match Row** Items that have multiple matches will display a message with the number of how many matches (L28.1) & a "View All Results" button (L28.2). The row columns will be merged except for the row number and select column. Pressing button L28.2 will take user to search results page (3.2.29) and displays the number of results that matched. A second section will allow the user to modify the search term as defined for Unmatched rows in EL17. The L29 text label is modified for this purpose. The select checkbox is unselected/unchecked by default. Selecting the checkbox will allow the user to then press the Buy Selected (EL10) or Delete Selected (EL25) buttons to perform corresponding actions on selected items. Adding an unresolved item to the basket/cart will result in an error message on the cart/basket page for those items. (This is existing functionality)
EL29	**Search Part Number** User may choose to search for modified term instead of viewing multiple matches. Function is same as EL17. Field should be pre-populated with term used for search.
EL30	**Delete Overlay Warning Confirmation** Appears when user presses the "Delete Selected" (EL25) button with items selected. Warns user by way of overlay before deleting action is processed and irrevocable. Pressing Delete button here will complete the delete action on all selected items. Pressing Cancel will close the overlay and not delete any items. If no items are selected the button is disabled
